Copyright

Vertically the sections should be distributed in thirds

Horizontally the sections should be distributed in thirds

side panels seem too large to hold just the toc. This may have to be re-thought. If removed the center main section will expand out side ways to take up freed space.

Footer section seem bare at the moment. Further content to go in the footer should be considered.

Header might contain a background image. this could be duplicated at the footer to harmonise.

Considering using rainbow text effect on Jumbotron heading for a more uplifting effect.
